

THE R.J.
MARSHALL
COMPANY

**Metal
Flake**

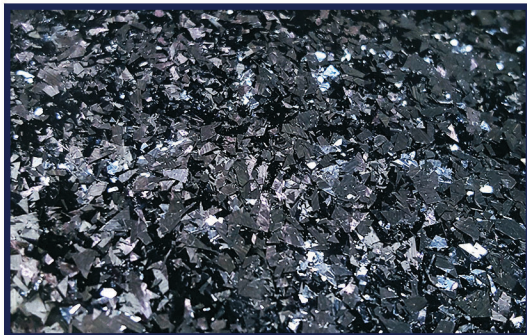

The Metal Flake (MFL) series are polymer based, random cut flakes that give a highly reflective big chip appearance when added at only 0.25% – 0.50% by weight to a pound of spray or pour granite matrix. Metal Flake is currently featured in some SGE and SFHD colors.

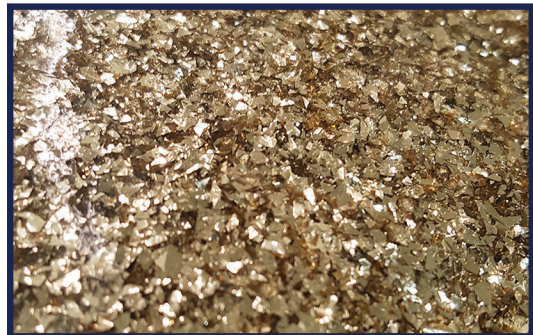

MFL CHROME - 1/8th

MFL COPPER - 1/8th

MFL GUNMETAL - 1/8th

MFL SAND - 1/16th

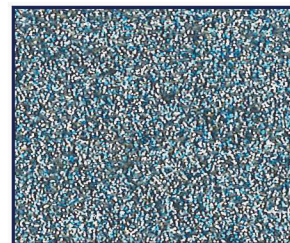

Packaged in approx. 1.7lb Gallons, 10lb Square Buckets and 25lb Boxes.

Reflections Additives

The Reflections series is a polymer and ATH based metallic additive that can be blended into our granite fillers to bring your products a dramatic effect. The material is Class I flame and smoke retardant, as well as chemical and stain resistant. Reflections gives a sparkle effect to granite filler allowing you to offer a wider variety of appearances by easily adding them at 5-10% dry weight to your existing fillers. The LXS, LXX & SGP product lines feature colors with Reflections Additives.
